HealthFlow replaces the registers, the spreadsheets and the four different apps a diagnostic centre juggles today. It is built for how Indian labs and clinics actually work, and it carries your name on every screen, every report and every message.

₹999/mo

FOREVER — INDUSTRY CHARGES ₹8,000

Every rupee accounted for, to the paisa.

Phone-first billing, discounts with a reason, cash-vs-online split and live receivables. Nothing re-typed, nothing skimmed, nothing lost between the counter and your books.

Money – gross billed, net-to-you, receivables & discounts, live across every branch.

- ◆ **One-tap bills & receipts** with GST
- ◆ **Discount & refund audit** — who, why, how much
- ◆ **Receivables aging** — chase the right dues
- ◆ **Cash-heavy staff flags** for safer counters

A 20-year-old and a 6-month-old aren't measured the same way.

Reference ranges resolve to each patient's age and gender, so values flag correctly the instant they're entered. Outsourced a test? Upload the outside lab's PDF and it merges into your report. Finalised reports lock, sign, and carry a QR the patient can scan to verify.

- ◆ Age & gender-specific reference ranges
- ◆ Automatic flags on every analyte
- ◆ Upload outside-lab PDFs into one report
- ◆ QR on print — scan to verify
- ◆ Dual sign-off — lab in-charge & pathologist

Your letterhead, age/gender ranges, auto flags – signed, with a scan-to-verify QR.

The bill and the report arrive before the patient reaches the car park.

Sent from your own WhatsApp Business number, tracked from sent to delivered to read. The receipt and the signed, QR-verified report land as clean PDFs — no app for the patient to install.

Sent from your own WhatsApp Business number — tracked sent · delivered · read.

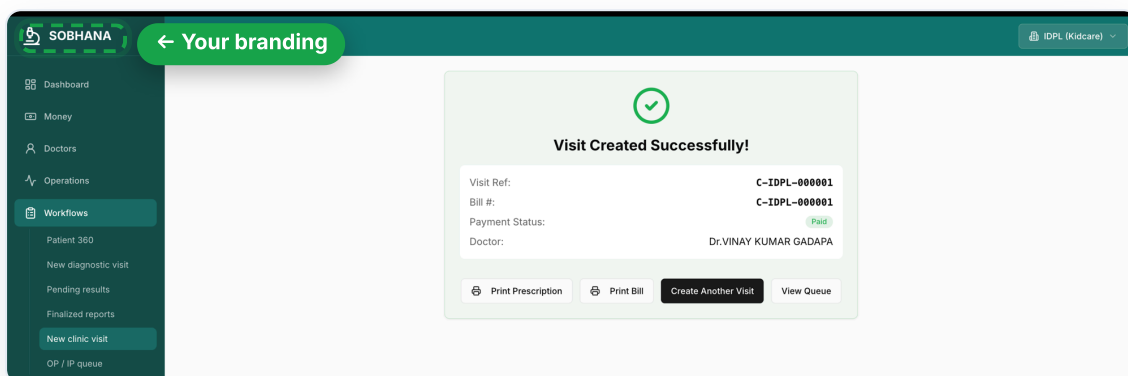

The receipt — opened straight from WhatsApp on the patient's phone.

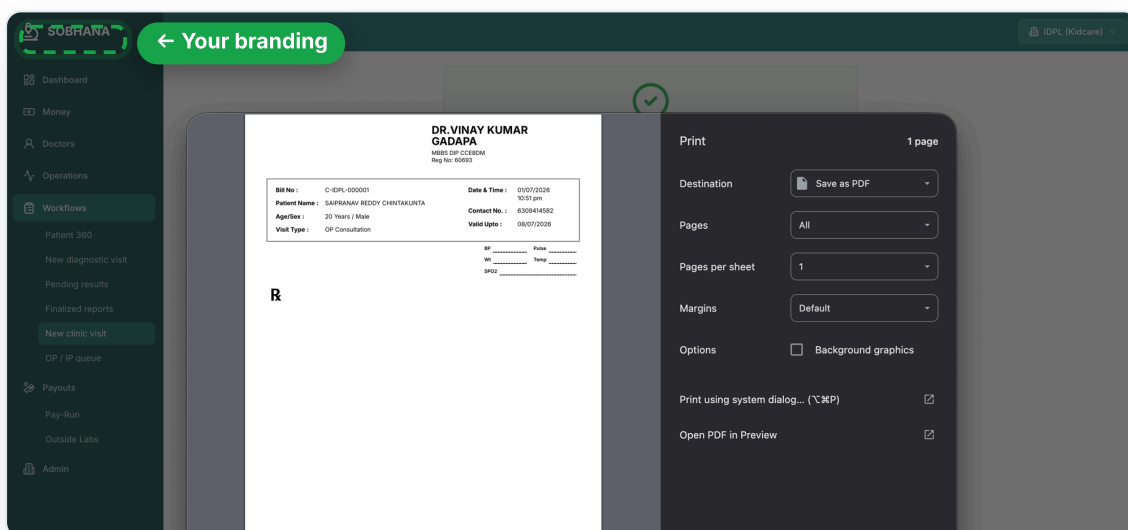

The signed, QR-verified report — the same, straight to the phone.

Not just a lab. The whole clinic runs here too.

Register a consultation, take payment, print the doctor's prescription on their own letterhead and drop the patient into the live queue — on the same record as their diagnostics.

Consultation billed — visit reference, payment status, print prescription or bill in one screen.

Doctor's prescription — their own letterhead, registration number, vitals block & Rx.

NO AWKWARD MONEY CONVERSATIONS

Returns within the doctor's window? The revisit is free.

Each consultation carries a validity. If the patient comes back inside it, HealthFlow recognises them and charges nothing — no staff judgement, no register to check.

Settle every doctor in one run — and WhatsApp the payslip.

Referral and consulting commissions accrue automatically as you bill, per test and per rule. At month-end, one worklist shows exactly what's owed. Pay, and each doctor receives their statement on WhatsApp — nothing to dispute.

Know your numbers before your morning chai.

Net revenue after commissions, turnaround times and every branch's performance — live. And any patient, across every branch, on one timeline: history, dues and reports together.

Owner dashboard — money today, payout liability, diagnostics & comms, live.

Patient 360 — one timeline across diagnostics & clinic, with dues.

COMING SOON

Targeted reminders from results

When a result crosses a line — high sugar, low haemoglobin, a due re-test — the right patient gets a personalised WhatsApp at the right time. Recalls that write themselves.

Result flagged → Rule matches → Auto WhatsApp → Patient returns

COMING SOON

Campaigns to your whole base

Health-camp offers, festival packages and master-checkup pushes, sent to a segment of your patient list in a few taps — then measured by who actually booked.

Pick segment → Craft offer → Send → Track bookings

COMING SOON

Recall & health-check campaigns

Annual master-checkup recalls, chronic-care follow-ups and birthday wishes — set once, run forever, quietly filling slow days.

Last visit $\geq$ 1 yr → Auto recall → Re-book

Every release lands in your account — free.
